REVISED DESCRIPTION OF TASK I

Provide time and material to conduct studies and investigations for accomplishing the objectives of this task. The work encompassed in this task is preliminary and pathfinding in nature and the specifics may be revised from time to time by the Technical Representative of the Contracting Officer. If certain items warrant further work beyond the preliminary and pathfinding phase and require more extensive work than is appropriate for this task, then those items must be separated into separate tasks or separate contracts or separate contracts to other organizations whichever is appropriate.

Current examples of specific objectives of this task are:

1. Film processing equipment studies parallel to the HTA/5 investigations.
2. Submicron measurement error analysis.
3. Signal strength of broadcast radiation of closed circuit TV.
4. Rear projection screen studies parallel to the U V excited phosphor screen investigations.

Informal reports of activity and progress will be made at frequent intervals to the Technical Representative of the Contracting Officer. A summary log of activities will be submitted monthly with invoices for approval of the Technical Representative of the Contracting Officer.
